

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

and cat-tails, along with the Yellow-headed Blackbird, which are met with at almost every step. But many of the wren's nests were just finished or contained only partial sets.

Along the edges of the sloughs, the Tree Swallow nests abundantly in old holes of Downy Woodpeckers or Flickers, from five to seven eggs being laid; but rarely over five, which is the average set.

WALTON I. MITCHELL, *St. Paul, Minn.*

COMMITTEE ON GEOGRAPHICAL DISTRIBUTION.

"And now comes the dull season" sighs many an ornithologist, as he lays by his field-glasses and note-book and prepares to go into winter quarters. But this thing need not be. Winter is the best time to begin the work on the local *bird census*. At this time of the year the bird population of any given area may be not only estimated but counted with reasonable accuracy. Our editor has kindly consented to give space to census reports in the February BULLETIN. Let each of our members who can possibly afford the time, put in a day or two, this coming holiday vacation, taking the census of all the birds found in their village, or on the farm, or, if in the city, in the neighboring park.

Some of our northern members will be surprised at the number of Woodpeckers, Kinglets, Chickadees and foolhardy Robins which a systematic search will discover. List every individual and send the result, together with a brief description of the area examined and such remarks as occur to you, to the chairman of the committee. Such reports as are available for immediate publication will appear in the February BULLETIN, and the rest will be retained (with permission) as a nucleus for more extended work.

W. L. DAWSON, *Oberlin, O.*

ELECTION OF OFFICERS.

An unofficial note from Mr. Frank L. Burns, Judge of Elections, announces the election of the following officers:

President.—R. M. Strong, Lake Forest, Ill.

Vice-President.—N. Hollister, Delavan, Wis.

Secretary.—W. L. Dawson, Oberlin, Ohio.

Treasurer.—Lynds Jones, Oberlin, Ohio.
